

Running Head: PSYC6530 CLINICAL RESEARCH PROJECT

Dr Martin P. Johnson (PhD)

Miss Sany Andrijic (BPsych; PGDipProfPsych)

A Prospective Cross-Sectional Study of Psychosocial and Weight Factors in Predicting  
Successful Post-Bariatric Surgery Outcomes

Master of Clinical Psychology

School of Psychology

University of Newcastle, Australia

Submitted 1 May 2019

**Statement of Originality**

This thesis contains no material which has been accepted for the award of any other degree or diploma in any University or other tertiary institution and, to the best of my knowledge and belief, contains no material previously published or written by another person, except where due reference has been made in the text. I give consent to this copy of my thesis, when deposited in the University Library\*, being made available for loan and photocopying subject to the copyright Act 1968.

**Acknowledgement of Collaboration**

I hereby certify that the work embodied in this thesis has been done in collaboration with other researchers. I have included as part of this thesis a statement clearly outlining the extent of collaboration, with whom and under what auspices. I contributed to the development of the research question, the database search, the statistical analysis, the interpretation of results and editing of the manuscript. Dr Martin Johnson contributed to the development of the research question, the formulation of the methodology, the interpretation of results, and editing of the manuscript. Ms Amy Stevens assisted in the data collection.
