

Designing mHealth Systems for Behaviour Change

Tyler Joel Noorbergen BIT (Hons) and B Bus combined (Newcastle)

A thesis submitted in fulfilment of the requirements for the degree of Doctor of
Philosophy in Information Systems

February 2021

This research was supported by an Australian Government Research Training Program
(RTP) Scholarship

Statement of Originality

I hereby certify that the work embodied in the thesis is my own work, conducted under normal supervision.

The thesis contains no material which has been accepted, or is being examined, for the award of any other degree or diploma in any university or other tertiary institution and, to the best of my knowledge and belief, contains no material previously published or written by another person, except where due reference has been made. I give consent to the final version of my thesis being made available worldwide when deposited in the University's Digital Repository, subject to the provisions of the Copyright Act 1968 and any approved embargo.

Tyler Noorbergen

Acknowledgement of Authorship

I hereby certify that the work embodied in this thesis contains published paper/s/scholarly work of which I am a joint author. I have included as part of the thesis a written declaration endorsed in writing by my supervisor, attesting to my contribution to the joint publication/s/scholarly work.

Tyler J. Noorbergen

By signing below, I confirm that Tyler Noorbergen contributed to the following papers:

Noorbergen, T. J., Adam, M. T. P., Roxburgh, M., Teubner, T. (2021). Co-design in mHealth systems development: Insights from a systematic literature review. *AIS Transactions on Human-Computer Interaction*, (accepted). Link: <https://doi.org/10.17705/1thci.00147>

Associate Professor Marc Adam

Acknowledgements

First and foremost, I would also like to extend my deepest gratitude to my supervisors, Associate Prof. Marc Adam and Prof. Mario Minichiello for their invaluable advice, continuous support, and patience during my PhD study. Their immense knowledge and plentiful experience have encouraged me in all the time of my academic research and daily life.

I am also extremely grateful to all the co-authors I had the pleasure of working with throughout my thesis including Prof. Timm Teubner, Associate Prof. Mark Roxburgh, Dr. David Cornforth, Laureate Prof. Clare Collins, and Prof. John Attia. Thank you all for your valuable contributions, constructive feedback, time, and allowing me the opportunity to learn from you. I would also like to extend my sincere thanks to Prof. Tanya McGill and Prof. Ricardo Buettner for serving on the board of examiners.

I am also very grateful to all the participants who were involved in my research. Without their contributions, I would not have been able to do any of this. I would also like to thank my lab mates, colleagues, and research team at the University of Newcastle for a cherished time spent together in the lab and for all the support they have given me throughout my PhD study. Lastly, I would like to thank my family and friends for their unwavering support and encouragement all through my studies. Without their tremendous understanding and encouragement in the past few years, it would be impossible for me to complete my study.

Tyler J. Noorbergen

Contents

Chapter 1. Motivation and Introduction	1
1.1. Potential of mHealth Systems	1
1.2. Challenges of Designing mHealth Systems	3
1.3. Research Questions and Objectives	5
1.4. Research Methodology.....	8
1.5. Ethical Considerations.....	9
1.6. Thesis Structure.....	10
Chapter 2. Co-design in mHealth systems development: Insights from a systematic literature review	12
2.1. Introduction	12
2.2. Theoretical Background	15
2.2.1. Foundations of Co-design.....	15
2.2.2. Co-design Frameworks.....	16
2.2.3. Co-design in mHealth Systems Development	19
2.3. Research Method.....	20
2.3.1. Selection Criteria	21
2.3.2. Search Strategy	21
2.3.3. Data Extraction	22
2.3.4. Bibliographic Analysis	23

2.4. Results	23
2.4.1. Application Contexts	24
2.4.2. Stakeholders.....	25
2.4.3. Employed Methods.....	28
2.4.4. Co-Citation Analysis	33
2.5. Discussion and Conclusions.....	36
2.5.1. Knowledge Gaps.....	36
2.5.2. Practical Implications	39
2.5.3. Limitations.....	42
2.6. Concluding note	42
Chapter 3. Exploring the Design of mHealth Systems for Health Behaviour Change using Mobile Biosensors	44
3.1. Introduction	44
3.2. Related Work and Background	47
3.2.1. Related Work on Designing mHealth Systems for Behaviour Change.....	48
3.2.2. Involvement of Stakeholders and Remote Systems	51
3.3. Research Methodology.....	53
3.3.1. Deduction: Development of an Integrative Theoretical Framework.....	54
3.3.2. Induction: Development of Design Guidelines	56
3.4. An Integrative Theoretical Framework	60
3.4.1. The Behaviour Change Wheel and the COM-B System of Behaviour	60
3.4.2. Framework.....	62

3.4.3. Feedback Loop and Mobile Biosensor Measurements (P1)	63
3.4.4. The Influence of the mHealth Interface on Capability (P2)	67
3.4.5. The Influence of the mHealth Interface on Opportunity (P3)	68
3.4.6. The Influence of the mHealth Interface on Motivation (P4)	71
3.5. Design Guidelines	74
3.5.1. Guideline 1: Mobile Biosensor Recordings.....	74
3.5.2. Guideline 2: Affective Visual Assets	76
3.5.3. Guideline 3: Goal-setting Support.....	79
3.5.4. Guideline 4: External Support	83
3.5.5. Guideline 5: Levels of Data Integration	85
3.5.6. Guideline 6: Stakeholder Involvement	89
3.6. Discussion and Conclusion	90
3.6.1. General Discussion	90
3.6.2. Limitations.....	97
3.6.3. Future Research	99
3.7. Concluding Note	100
Chapter 4. Using co-design in mHealth systems development: A qualitative study.....	101
4.1. Introduction	101
4.2. Theoretical Background and Related Work	103
4.2.1. Related Work on mHealth Systems Design	103
4.2.2. Co-design Frameworks.....	104

4.2.3. Co-design in mHealth	106
4.3. Method	107
4.3.1. Interview Participants	107
4.3.2. Data Collection	108
4.3.3. Data Analysis.....	109
4.4. Results	110
4.4.1. Contextualization of co-design framework to mHealth context.....	110
4.4.2. Guidelines for Co-Designing in mHealth	114
4.5. Discussion	134
4.5.1. General Discussion	134
4.5.2. Implications	137
4.5.3. Limitations and Opportunities for Future Research	138
4.6. Concluding Note	138
Chapter 5. Conclusion and Outlook.....	139
5.1. Contributions.....	139
5.2. Implications.....	143
5.3. Outlook.....	145
Appendix A.....	148
A.1. Exploring the Design of mHealth Systems for Health Behaviour Change using Mobile Biosensors	148
A.1.1. Interview Guide	148
A.1.2. Design Guidelines Overview	152

Appendix B.	154
B.1. Using Co-design in mHealth Systems Development: A Qualitative Study	154
B.1.1. Interview Guide	154
B.1.2. Background of Interview Participants	156
