143.

ACKNOWLEDGEMENTS

I am deeply grateful to my supervisor, Dr J. R. Giles,
for the many hours he has spent reading and discussing my material,
as well as the constant encouragement and understanding he has
shown throughout my studies.

I would also like to thank:

Dr A. M. Sinclair, for several invaluable conversations and
suggestions;

Dr G. de Barra, for many helpful conversations, and for reading
a draft of my thesis;

Professor F. F. Bonsall, for several valuable conversations and
for arranging for me to spend from June to December of 1971 at
the University of Edinburgh;

Professor R. G. Keats, who gave me every assistance within the
Department of Mathematics at the University of Newcastle, N.S.W.;

Mrs M. Bowden, Mrs R. Mills and especially Miss P. Hinchey who
so accurately and quickly typed the thesis.

Lastly I would like to express my gratitude to the
Commonwealth Department of Education and Science without whose
scholarship my research would have been impossible, and for their
permission for me to attend a conference on Numerical range held at
the University of Aberdeen in July 1971, and to spend from June till
December 1971 studying overseas.
